Work experience

Distinguished professor

Zhejiang Normal University
College of Mathematical Medicine

 August 2024 – present  Jinhua, China

Conducting research on Bayesian deep learning, topological deep learning, and on their applications in biomedical data science and healthcare. Leading a research team in these areas.

Professor in the mathematics of data science

The University of Manchester
Department of Mathematics

 October 2023 – June 2024  Manchester, UK

Research on Bayesian deep learning and topological deep learning. Supervised undergraduate and postgraduate students. Advisor of studies of undergraduate and postgraduate students. Board member of the Data Science and Artificial Intelligence Institute.

Reader in the mathematics of data science

The University of Manchester
Department of Mathematics

 October 2020 – September 2023  Manchester, UK

Conducted research on Bayesian deep learning and topological deep learning. Taught ‘longitudinal data analysis’ module. Supervised undergraduate and postgraduate students. Advisor of studies of undergraduate and postgraduate students. Lead of the advanced mathematics cluster of the Centre for Digital Trust and Security. Board member of the Data Science and Artificial Intelligence Institute. Chair of the Mathematics Department forum.

Research scientist

Oak Ridge National Laboratory
Computer Science and Engineering Division

 April 2019 – September 2020  Oak Ridge, USA

Strategic hire in artificial intelligence. Principal investigator of two-year laboratory directed research and development

(LDRD) project ‘Scalable Bayesian uncertainty quantification for neural networks’. Conducted research on Bayesian inference for artificial neural networks.

Assistant professor in statistics

University of Glasgow
School of Mathematics and Statistics

 September 2015 – March 2019  Glasgow, UK

Conducted research on Markov chain Monte Carlo methodology. Taught three courses, namely ‘big data analytics’, ‘data analysis’ and ‘statistical methods’. Supervised undergraduate and postgraduate students. Advisor of studies of undergraduate and postgraduate students. Head of taught postgraduate programme in statistics and data analytics. Organizer of statistics seminar.

Research fellow in statistics

University of Warwick
Department of Statistics

 July 2014 – August 2015  Coventry, UK

Conducted research on two projects. One project was related to Bayesian modelling of single-cell RNA sequencing data. The other project was related to Bayesian inference for rough differential equations.

Research associate in statistics (80% of time) Administrator of NCSML (20% of time)

University of Warwick
Department of Statistics

 January 2014 – June 2014  Coventry, UK

For 80% of work time, conducted research on Bayesian model selection via population Markov chain Monte Carlo for a biochemical pathway of Ewing sarcoma. For the remaining 20% of work time, administrated the UK-wide network on computational statistics and machine learning (NCSML).

Research associate in statistics

UCL
Department of Statistical Science

 December 2011 – December 2013  London, UK

Conducted research on variance reduction for differential geometric Markov chain Monte Carlo methods.

Research associate in statistics

University of Cambridge
Department of Public Health and Primary Care

 February 2010 – November 2011  Cambridge, UK

Performed statistical analysis of big genomic data sets to identify genetic determinants of blood lipid levels. Provided support for data filtering, bioinformatics and computing tasks.

Research statistician

Queen Mary University of London

Barts and The London School of Medicine and Dentistry

📅 July 2009 – October 2009

📍 London, UK

Researched epidemiological associations between alcohol abstinence and personality disorders.

Education

PhD in statistics

University of Warwick

Department of Statistics

📅 September 2005 – June 2009

📍 Coventry, UK

Thesis title: ‘Statistical developments in chaos communications’.

MSc in statistics

University of Warwick

Department of Statistics

📅 September 2004 – August 2005

📍 Coventry, UK

Graduated with distinction. Dissertation title: ‘Aspects of chaos and chaos communications’.

BSc in mathematics

University of Ioannina

Department of Mathematics

📅 September 2000 – August 2004

📍 Ioannina, Greece

Graduated with the second highest mark of 72.3%. Completed the concentration ‘Statistics and operations research’.

Selected publications

Grants

Manchester-Melbourne research fund

The University of Manchester

📅 October 2021 – September 2022

📍 Manchester, UK

Funding body: The University of Manchester. Duration: 12 months. Budget: £4,776. Role: co-investigator. Title: ‘FinTech and financial crimes: methods, applications, and regulations’. Collaborative partners: The University of Manchester and University of Melbourne. Principal investigator: R. Allmendinger. Co-investigators: M. Zachariadis, D. Buil Gil, E. Barrett, N. Lord, A. Freitas, M. Joshi, and T. Papamarkou.

LDRD grant

Oak Ridge National Laboratory

Computer Science and Engineering Division

📅 April 2019 – March 2021

📍 Oak Ridge, USA

Funding body: laboratory directed research and development (LDRD) program of Oak Ridge National Laboratory. Duration: 24 months. Budget: \$466,300. Role: principal

investigator. Title: ‘Scalable Bayesian uncertainty quantification for neural networks’.

Scholarships

PhD scholarship

University of Warwick

Department of Statistics

 September 2005 – June 2009  Coventry, UK

Funding body: Centre for Research in Statistical Methodology (CRiSM) of the Department of Statistics, University of Warwick. Duration: 45 months. Scholarship amount: £45,000.

BSc scholarship for studies at the third year

University of Ioannina

Department of Mathematics

 September 2002 – August 2003  Ioannina, Greece

Funding body: Greek Institute of State Scholarships. Scholarship amount: €600. Awarded due to highest third year mark of 78.2%.

Teaching experience

Longitudinal data analysis

The University of Manchester

Department of Mathematics

 February 2021 – April 2023  Manchester, UK

Teaching this module to fourth year undergraduate and postgraduate students.

Theory of statistical inference

University of Liverpool

Department of Mathematics

 February 2022 – April 2022  Liverpool, UK

Developed and taught this module to third year undergraduate students.

Big data analytics

University of Glasgow

School of Mathematics and Statistics

 January 2017 – March 2019  Glasgow, UK

Developed and taught this module to fourth year undergraduate and postgraduate students.

Data analysis

University of Glasgow

School of Mathematics and Statistics

 January 2016 – March 2018  Glasgow, UK

Taught this module to third year undergraduate and postgraduate students.

Statistical methods

University of Glasgow

School of Mathematics and Statistics

 September 2015 – December 2015  Glasgow, UK

Taught this module to first year undergraduate students.

Supervisory experience

Post-doctoral researchers

Danny Wood (The University of Manchester)

PhD students

- George Livesey (The University of Manchester)
 - Amr Mousa (The University of Manchester)
 - Marcos Negre Saura (The University of Manchester)
 - Jana Stella (The University of Manchester)
-

MSc by research students

Alan Lazarus (University of Glasgow)

Administrative experience

Board member of IDSAI

The University of Manchester

Digital Futures Network

 September 2022 – June 2024  Manchester, UK

Board member of the Data Science and Artificial Intelligence Institute (IDSAI). IDSAI delivers the activities of the Data Science and Artificial Intelligence theme, which is one of the six themes under the umbrella of the Digital Futures Network at The University of Manchester.

Chair of the Mathematics Department forum

The University of Manchester

Department of Mathematics

 October 2021 – August 2023  Manchester, UK

Chairing the Mathematics Department forum. The purpose of the forum is to discuss matters pertaining to the Department.

Advanced mathematics cluster lead of CDTS

The University of Manchester

Digital Futures Network

 October 2021 – June 2023  Manchester, UK

Lead of the Advanced Mathematics cluster of the Centre for Digital Trust and Security (CDTS). CDTS is one of six themes under the umbrella of the Digital Futures Network at The University of Manchester.

Head of taught postgraduate programme

University of Glasgow

School of Mathematics and Statistics

 August 2018 – March 2019  Glasgow, UK

Managed the on-campus programme in statistics and data analytics consisting of five postgraduate taught degrees, namely the MSc in statistics, MSc in data analytics, MSc in biostatistics, MSc in environmental statistics and MRes in advanced statistics.

Organizer of statistics seminar series

University of Glasgow

School of Mathematics and Statistics

📅 September 2016 – July 2018

📍 Glasgow, UK

Administrator of NCSML

University of Warwick

Department of Statistics

📅 January 2014 – June 2014

📍 Coventry, UK

Administered the UK-wide network on computational statistics and machine learning (NCSML). Coordinated mailing lists and social media to disseminate NCSML activities. Maintained a website for NCSML using Django, HTML and CSS.

Chair of staff student liaison committee

University of Warwick

Department of Statistics

📅 September 2006 – August 2007

📍 Coventry, UK

Reviewer experience

Reviewer for journal articles

Journal of Statistical Software, Neurocomputing, Statistics and Computing.

Reviewer for conference articles

AAAI 2020, NeurIPS 2018, AISTATS 2018.

Editorial experience

Co-editor-in-chief for ACM TOPML

Association for Computing Machinery (ACM)

📅 June 2023 – Present

Associate editor for Journal of Statistical Software

Foundation for Open Access Statistics

📅 October 2021 – Present

Associate editor for Foundations of Data Science

American Institute of Mathematical Sciences (AIMS)

📅 November 2019 – Present

Associate editor for RSS Series C

John Wiley and Sons

📅 January 2020 – January 2022

Associate editor for Neurocomputing

Elsevier

📅 January 2019 – September 2020

Software development

Python packages

- Contributed to TopoNetX.
- Contributed to TopoEmbedX.
- Contributed to TopoModelX.
- Developed `kanga`.
- Developed `eeyore`.

Julia packages

- Developed `DualNumbers`.
- Contributed to `ForwardDiff`.
- Contributed to `StatsBase`.
- Contributed to `Distributions`.

Languages

Greek Native and first language

English Primary language

Research visits

PhD visitor

Electronic and Information Engineering Department

Polytechnic University, Hong Kong

📅 July 2008 - August 2008

📍 Hong Kong, China

Honors and awards

Best paper award for the research track

ECML PKDD

📅 2023

The paper ‘Towards efficient MCMC sampling in Bayesian neural networks by exploiting symmetry’ has been selected among the 196 accepted papers of the research track as best paper by the ECML PKDD best paper award chairs.

ELLIS member

The University of Manchester

📅 December 2022 – Present

Member of the European Laboratory for Learning and Intelligent Systems (ELLIS).

Committee member of RSS CSML

The University of Manchester

📅 November 2022 – Present

Committee member of the Computational Statistics and Machine Learning Section of the Royal Statistical Society (RSS CSML).

Among 30% highest scoring reviewers

NeurIPS

 2018

Evaluated by the area chairs as one of the top 30% highest scoring reviewers for NeurIPS 2018.

Matthews, and R. Breitling. “The silicon trypanosome: a test case of iterative model extension in systems biology”. In: *Advances in microbial systems biology*. Vol. 64. Advances in Microbial Physiology. Academic Press, 2014, pp. 115–143.
- T. Papamarkou. “Two aspects of optimum CSK communication: spreading and decoding”. In: *Chaotic systems: theory and applications*. World Scientific, 2010, pp. 249–256.
- “Optimal spreading sequences for chaos-based communications; using CSK as a case study”. In: Department of Engineering, University of Cambridge, UK, Oct. 3, 2007.
- “Statistical aspects of chaos and chaos-based communication systems”. In: School of Mathematics and Statistics, University of Glasgow, UK: Research Students’ Conference in Probability and Statistics, Mar. 21, 2006.

Talks

- “Topological deep learning”. In: The University of Manchester, UK: ELLIS summer school on machine learning for healthcare and biology (Manchester Unit), June 14, 2023.
- “The premise of approximate MCMC in Bayesian deep learning”. In: Department of Statistics, University of Warwick, UK: Warwick Statistics 50th anniversary conference, Sept. 8, 2022.
- “The premise of approximate MCMC in Bayesian deep learning”. In: Department of Computer Science, University of California Santa Barbara, USA, Sept. 26, 2022.
- “Challenges in Markov chain Monte Carlo for Bayesian neural networks”. In: Glasgow, UK: ICMS, Apr. 23, 2021.
- “Challenges in Bayesian inference via Markov chain Monte Carlo for neural networks”. In: Philadelphia, USA: JSM, Aug. 6, 2020.
- “Monte Carlo methods in random environment”. In: School of Mathematics, Statistics and Physics, Newcastle University, UK: i-like workshop, June 20, 2018.
- “Approximate likelihood inference for discretely observed rough differential equations”. In: School of Mathematics, Statistics and Physics, Newcastle University, UK, Dec. 1, 2017.
- “Klara: a framework for Monte Carlo methods in Julia”. In: MIT, USA: Julia conference, June 23, 2016.
- “EWS-FLI1 Employs an E2F switch to drive target gene expression”. In: University of Sao Paulo, Brazil: Research links British Council-FAPESP workshop ‘Integrative research: challenges of complex systems for technological applications’, Mar. 11, 2015.
- “Patterns of ethno-linguistic and genomic diversity in Africa”. In: School of Mathematical Sciences, Queen Mary University of London, UK, Feb. 10, 2011.
